And many special prices for foreign

and mixed pairs.

Here results of last edition

http://win.figsp.it/files/BangolfArena/2013/0120_Vedano_ITL1/result.htm

Every year results on line all night long

the course

Lane 1: slow shot on the middle of the right side and passing near the hole on the right side the ball goes to goal. It's not possible a good return when the ball touches the hole a little bit.

Lane 2: very slow shot on the middle of the left side and 95% of good shots goes directly to the hole without return from the top of the circle.

Lane 3: slow shot from the middle of the start circle and entering into the obstacle on the right side, so the ball can go out clearly.

Lane 4: it's not so easy because you must prepare the ball (temperature) and play not so slowly but if you play strongly the ball return to your feet. In the second side, after the obstacle, the ball doesn't go directly to the hole but from the return from the top of the circle.

Lane 5: it's important to pass near the first stone (10 cm), so the ball hits the best line to the hole; it's very difficult the return from the top of the circle.

Lane 6: you can play to each side before the middle and the return is from the other side near the hole. It's important the way of putting from the start line.

Lane 7: you must play a quite slow shot to pass sweetly the hill so the fast ball doesn't jump too much and remain to the right line passing 15 cm right from the hole and return from the second beat to the circle.

Lane 8: you play slowly from the right side of start circle passing into the middle of the obstacle.

Lane 9: play to the left stone side very slowly and so the ball goes out in the best way making an ace directly; no return from the top of the circle.

Lane 10: there are two different shot; the first directly from the right side of the start circle to the hill, and the second beating the left middle of the hill. In each way of playing the ball makes a star line into the circle.

Lane 11: very slow shot; the ball must touch the inox side and goes to the hole.

Lane 12: slow shot hitting the middle of stone side and later the left side and go directly or by return from the left side of the hole.

Lane 13: very slow shot passing 5/10 cm from the first stone so the ball can go near (2/5 cm) the hole and goes inside after 2 or 3 bounds.

Lane 14: you must beat the left side 15 cm before the finish and so the ball goes to right side and later near the hole on right side (5/10 cm) for ace.

Lane 15: it's one of two difficult lanes where you play slowly and exactly. The ball goes in only by return from left side.

Lane 16: slow shot hitting the right side after the obstacle passing on left side and make ace by return.

Lane 17: you can play slowly to the left side and after the obstacle hitting the right side and go directly or by return; the second shot directly with two different return or directly

Lane 18: easy shot on each side.
